# Daily Occupational Stress

Coping up with a modern lifestyle means we are busy most of the time. The solution is simple. Using smart technology, we can make our lives easier and more comfortable.

Imagine having a massage powered by innovative technology to provide total relaxation.

A survey showed that 51% of Malaysian employees suffer from at least one dimension of work-related stress, and 53% get less than 7 hours of sleep.

Financial concerns burden 22% of employees as reported by Malaysia's Healthiest Workplace survey by AIA Vitality 2019.

Additionally, 20% of employees report that workplace bullying contributes to their overall stress.

To add to that, working long hours hunched over the computer and the culture of overworking are manifesting in clinical health conditions and sleep deprivation according to the survey.

A major finding by HR solutions provider, Employment Hero, said in its Employee Wellness Report that 58% of workers agree feeling burnt out from their work in the last three months.

# OGAWA MAESTRO NEW

POWERED BY OVERSEER

The OGAWA MAESTRO powered by OVERSEER, combines Smart AI customization, convenience and comfort to provide a seamless and immersive massage experience.

The automated analyst offers indulgence and self-care on a whole new level. The AI processor detects the condition of your body before crafting an adaptive programme for the ultimate relaxation session.

Indulge yourself into a multi-sensory experience through vision, hearing and smell with OGAWA MAESTRO.

# Take Your Sleep Seriously With Red Light Therapy

Red light wavelengths encourage your brain to produce melatonin. This naturally occurring hormone tells your body it's time to sleep. The darker it gets, the more melatonin your body releases to put you into REM and circadian rhythm.

One study found that red light therapy helped improve sleep quality. The participants had a deeper sleep and fell asleep faster, too. If you need lights in your room at night, red LEDs or bulbs are the way to go.

## **What is REM sleep?**

This is the phase when we dream. During this time, brain activity, breathing, heart rate and blood pressure increases. Our eyes move rapidly while closed and the muscles in our arms and legs are temporarily inactive.

## **What are circadian rhythms?**

A circadian rhythm is a natural process that follows a 24-hour cycle which responds to light and dark, affecting most living things including animals, plants and microbes.

## **Benefits Of Red Light Therapy**

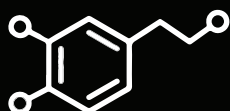

Regulate sleep pattern and schedule

Fight ageing

Promotes blood circulation

Increases melatonin levels

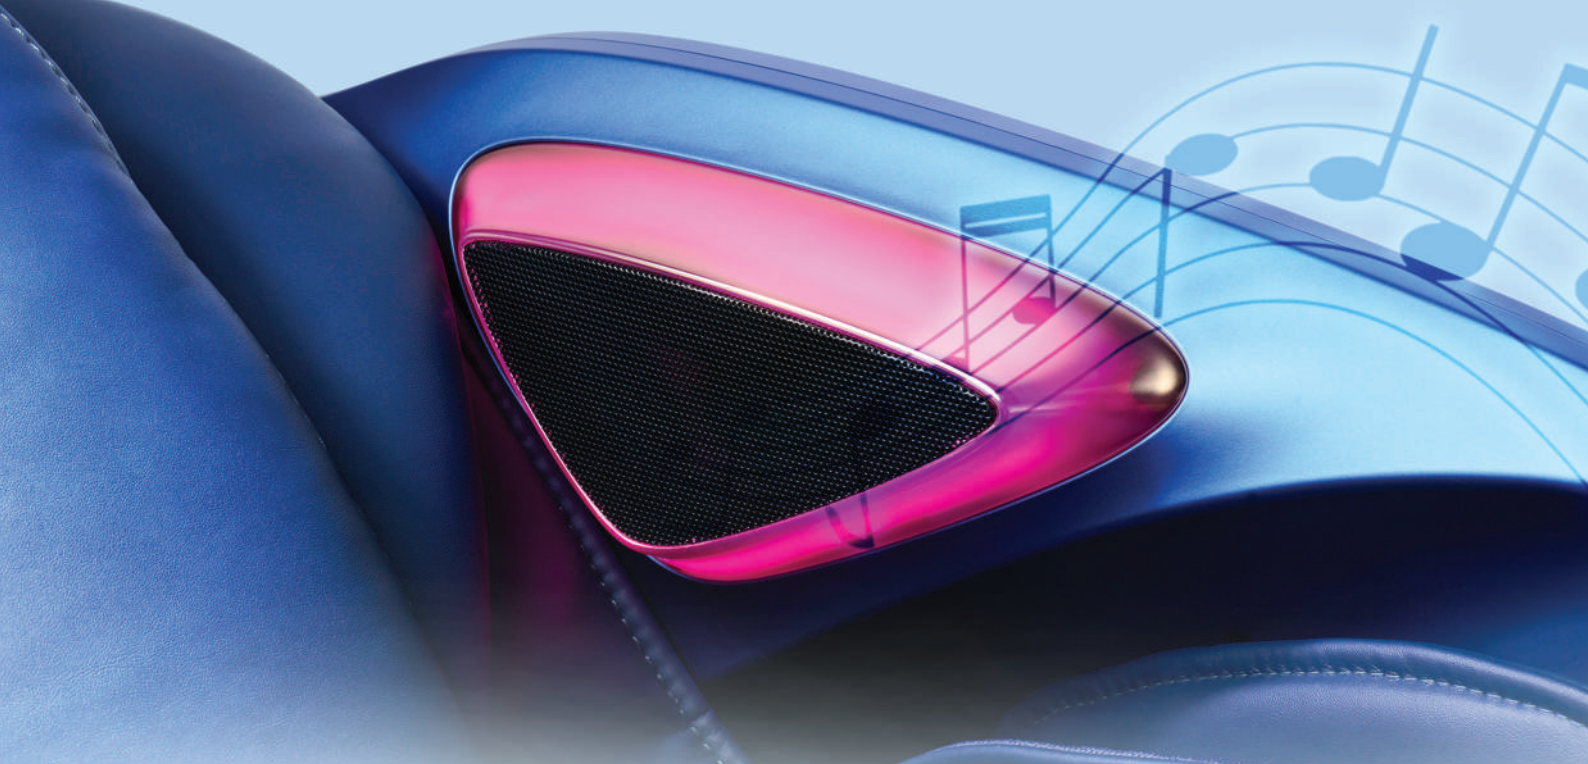

Induce sleepiness and makes one fall asleep quicker (Therapeutic light)

Improves sleep quality

# Experience Massage On A Cerebral Level With Binaural Beats Therapy

A binaural beat is an illusion created by the brain when you listen to two tones with slightly different frequencies at the same time.

Type of Brain Waves	Features
Delta - $\delta$	Deep Sleep, Healing
Theta - $\theta$	Deep Relaxation, Meditation
Alpha - $\alpha$	Relaxed Focus, Accelerated Learning, Stress Reduction
Beta - $\beta$	Focus Attention, Analytical Thinking and Problem Solving

## **Your Brain and Binaural Beats**

The two different tones align with your brain waves to produce a beat with a specific frequency. This frequency is the difference in hertz (Hz) between the frequencies of the two tones.

For example, if you are listening to a 440 Hz tone with your left ear and a 444 Hz tone with your right ear, you would be hearing a 4 Hz tone. This induces a meditative state, helping you to stay calm and refreshed.

Reduced anxiety

Foster positive moods

Helping you enter a meditative state

Lower stress

Improved sleeping habit

# Magnetic Field Therapy Through Negative Ions

Negative ions have been shown to directly strengthen human immunity, reduce weariness, promote metabolism, slow heart rate, and maintain normal blood pressure in hypertensive patients, among other physiological functions.

Additionally, it can boost the movement of cilia on the respiratory tract's surface, increase gland secretion, enhance lung ventilation, and enhance wound healing.

## ***Benefits of Negative Ions***

Get rid of static  
electricity

Boosts  
immunity

Combats  
fatigue

Unclogs blood  
vessels

Regenerates heart  
and lungs

Improves  
sleep quality

# Breathe In, Breathe Out With Air Pressure Massage Therapy

The Maestro chair guides you to breathe mindfully by syncing the air pressure's charging time, holding time and release time together with the movement of its massage rollers. Just like the teachings of yoga.

## The benefits

Increased flexibility

Increased muscle strength and tone

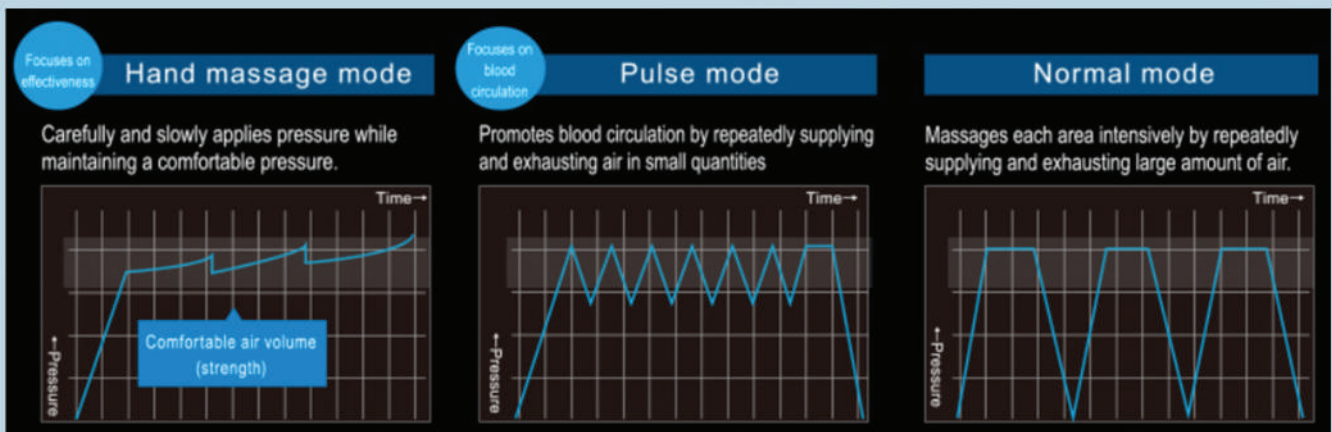

Improved respiration, energy and vitality

Maintaining a balanced metabolism

Weight reduction

# The Invigorating 4D Thermo Rollers

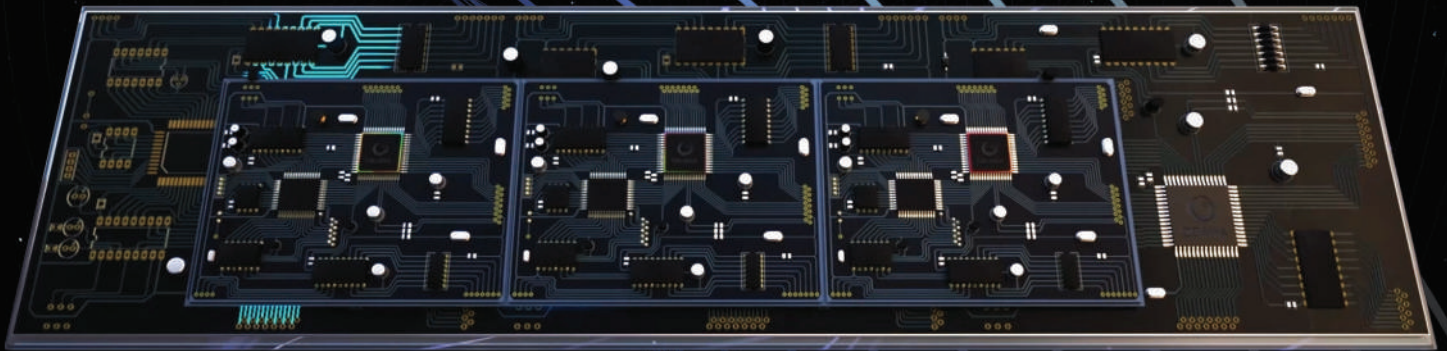

The invigorating 4D Thermo Rollers are integrated with Extreme Speed Heating Massage Wheel Technology™ that can heat up to approximately 50°C in 2.5minutes, offer strong yet delicate touch like human hands that deeply relaxes the tight muscles in the back and releases spinal pressure.

## 4D Thermo Rollers

# Human-Like Massage With 4D Gear Box

## Special Features

### JAPANESE TECHNOLOGY: M.5 GEN™

The 5<sup>th</sup> generation microprocessor quickly responds and accurately adjusts massage programmes at your command, redefining massage accuracy to the next level even higher precision and optimized system performance

### 8 SETS OF PRECISION SENSORS

Integration of 8 sets of sensors: temperature, position, strength, coverage, motor speed, acceleration and responsive feedback. Now with 4D mode enhancement to make it even more humanized while optimizing the sensor and movement control accuracy to target the pressure points with precision

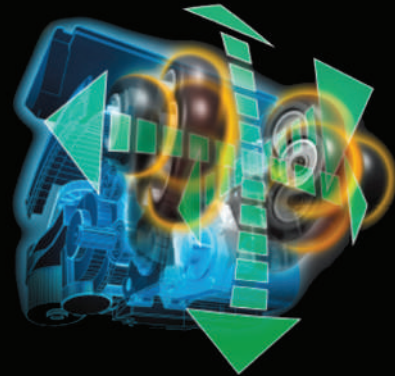

### AUTOMATIC ACUPOINT DETECTION TECHNOLOGY™

With closed-loop speed detection and high-precision calibration to locate acupressure points in the upper and lower body

# 4D Pro AI Technology

NEW

We have developed a control system in which information such as the user's body shape or state of muscles is automatically reflected in the massages through AI. We tailor the intensity, skill and smoothness to match each individual's body.

High torque/high accuracy basic massage movements with brushless motor and AI. We have upgraded all the kneading techniques to a higher level.

## AI Fatigue Tracker

Automatic detection of user's muscle stiffness and fatigue

Automatic detection of strength and intensity appropriate for user's muscle

Scanning and checking on user's state of muscle, followed by recommendation of suitable massage program

## AI Voice Command

# Foot Detox Roller

Massaging our feet can help to reduce pain and psychological symptoms such as stress and anxiety in addition to enhancing relaxation and sleep. Enjoy state-of-the-art foot reflexology with the MAESTRO's Foot Detox Roller which stimulates blood circulation and reduces swelling while relieving minor aches and pains.

# Product Specifications

Product name	MAESTRO		
Product No.	OG7599		
Power supply	AC 220-240V~, 50-60Hz		
Power consumption	150W		
Upper body massage	Range of massage (up-down direction)	Approx. 1.35m	
	Range of massage (left-right direction)	Massage wheel spacing (including massage wheel width) during use of the product Massage wheel spacing (including massage wheel width) during rolling on the back and up-down moving: Approx. 4.5cm~18.5cm	
	Range of massage (front-back direction)	Quantity of protruding massage wheels (adjustable intensity): Approx. 9.5cm	
	Massage speed	Kneading: Approx. 19 times/min, ~ approx. 36 times/min. Beat: Approx 267 times/min. ~438 times/min. (single side) Moving speed: Approx. 2.5cm/s ~ approx. 3.5cm/s	
Angle of inclination	Backrest: Approx. 128° ~ 154° Footrest: Approx. 7.8° ~ 66.5°		
Automatic power-off	Approx. 15 minutes (automatic power-off)		
Dimensions	When it is not tilting: (H x W x L)	Approx. 161cm x 78cm x 122cm	
	When it is tilting: (H x W x L)	Approx. 203cm x 78cm x 116cm	
Backrest	N.W. (kg): 92.6kg G.W. 111.5kg	MEAS. (L*W*H cm): 134 x 83.5 x 126.5cm	
Footrest	N.W. (kg): 23.4kg G.W. 26.5kg	MEAS. (L*W*H cm): 57 x 55 x 57.5cm	
Weight	Approx. 116kg		
Maximum body weight of user	Approx. 100kg
